

Are you a musician?

Instrumentalist or singer

Participate in a study on music reading!

We are researchers specializing in musical neurosciences, currently conducting a study on brain activity during music and word reading. We are seeking volunteers to participate in our experiment.

For the study, you will perform a simple task of perceiving images and sounds in an MRI. *If you participate, you will receive financial compensation.*

If you:

- Read music
- Are fluent in English since childhood
- Have no developmental cognitive disorders (dyslexia)
- Have no visual or auditive uncorrected disorders
- Have no MRI contraindications (metallic implants, claustrophobia, pregnancy)

Contact us to take at scores.expe.neuro@gmail.com

For any question or doubts about participation criteria, send us an email!
