

PAID RESEARCH STUDY (25 CAD)

Participate in a study on music

We are researchers specializing in musical neurosciences, currently conducting a study on brain activity during music and word reading. We are seeking volunteers to participate in our experiment.

In a **1-hour session**, you will be asked to perform a simple task of perceiving images while in an MRI.

Participate in our experiment if you:

- Do NOT read music
- Are fluent in English since childhood
- Have no developmental cognitive disorders (dyslexia)
- Have no uncorrected visual or auditory impairments
- Have no MRI contraindications (metallic implants, claustrophobia, pregnancy)

To take part in this experiment, answer the QR code survey:

Or contact us at scores.expe.neuro@gmail.com

For any questions or doubts about participation criteria, send us an email!
